

# Looking for an Umbraco partner? Plan your next project with us

Let's start here: We deliver custom development, mobile applications, Umbraco content management solutions and managed support services.

## FOCUS IS EVERYTHING

Layer One Media is a digital agency with world-class designers, developers, and digital strategists. We are dedicated to harnessing the combined power of strategy, design and technology to solve the challenges of marketing and sales organizations. Custom platform implementation - for Umbraco and Sitecore - is our specialty. We aim to transform the platforms' off-the-shelf capabilities to fit our customers' specific needs, all while creating a memorable customer experience driving toward your goals. Also, consider that Layer One Media has a dedicated core support team for managing large high profile Umbraco Sites.

Immensely complex Umbraco site builds? No problem. Tricky integrations? Yep, we've done that. Need a solution partner who can literally handle anything you throw at them? We got it! It takes more than glitz and shine to fuel business in a digital world. It takes expert-level knowledge about what makes or breaks a successful venture into digital channels. It takes data-driven methodology and rigorous research to understand the nuances of a customer's journey. And it takes technical expertise to ensure seamless integration with all your systems, from CRM to ERP and everything in between.

## SAMPLE OF UMBRACO CLIENTS

# Thank you.

CERTIFIED UMBRACO PARTNER SINCE 2012  
LAYER ONE MEDIA
